

Memorandum

To: All Employees

Date: June 21, 2005

From: Stephen P. Teale Data Center

Subject: New Department of Technology Services

As you know, the plans are underway to form the Department of Technology Services (DTS). This department will be formed by merging the current Stephen P. Teale Data Center, the current Health and Human Services Data Center and the Office of Network Services of the Department of General Services. The consolidation of the three entities is scheduled to take place on July 11, 2005.

At this time this consolidation will not require any physical movement by employees. The initial focus has been on merging the management team. We will keep you informed prior to any physical location changes.

The merge will enrich the services it offers to our customers. For more information regarding the consolidation that is about to take place go to WWW.DTS.CA.GOV.

Thank you in advance for your assistance during this transition period and creation of the new Department of Technology Services.

ANN BARSOTTI
